Making Metal Work For Your Business

Machining now includes **speed,** **size** and **accuracy**

Machining centres are becoming ever more efficient and continue to offer ever increasing levels of automation. Goodmans new KMC4000 provides all this and more.

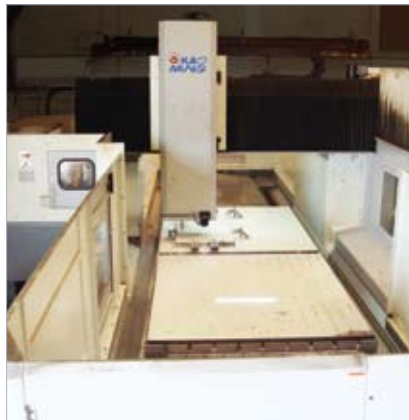

| FABRICATION | MACHINING | GRINDING | CUTTING |

With it's extra large table of 4000mm x 1650mm and a maximum load of 8,500kg the new vertical milling CNC machine offers both speed and capacity in one superb package.

For control the KMC4000 comes with the latest FANUC CNC controller, which can take instructions direct from emailed CAD drawings allowing work to commence immediately.

The new machine allows Goodman Metal Works to offer a greatly improved service for CNC machining, and perfectly compliments the current range of CNC machines.

- Latest FANUC CNC controller
- High speed spindle
6000rpm 30Hp
- High pressure through spindle coolant
- Large maximum load
- Axis travel x: 4000mm
y: 2000mm
z: 700mm

Goodman Metal Works provide a complete service of fabrication, machining, grinding and laser cutting over 45,000 ft² with a 20tonne lifting capacity.
